

**BIONADE®**

Made by: Helena, Max, Yannis, Leo, Viola and Guro

# How is Bionade sustainable?

Purity law and biological production process (100% biological)

Insect diversity

Use reusable glass bottles

Protection and preservation of biodiversity

High-quality local ingredients from organic farming

## Diversity Initiative 2030

- A project by biodiversity foundation and bionade
- Inform about and support biodiversity
- Plan projects and hands-on actions for insect-friendly balconies, gardens, rooftops and parking lots
- Want to build 17 million square meters of area in Germany insect-friendly by at least 2030

## How you can help!

- Support the project by buying the “Vielfalt2030 Box”
- It contains a colorful mixture of seeds to create a valuable habitat for bees and co.
- For each box purchased, Bionade donates 5€ to the biodiversity foundation
- By following the “Best-Practice-Guidelines” which were developed by Bionade you can help

# Roger`s history of Bionade
